## FULL STACK DEVELOPER

With 525+ hours of hands-on lab and class experience from Flatiron School and 5 years in the Hospitality Industry, I offer a unique blend of technical expertise and soft skills like problem-solving, attention-to-detail, and collaboration. I'm eager to apply this mix of skills to help drive impactful results for an innovative tech company that values excellence and teamwork.

## TECHNICAL SKILLS

JavaScript, React, Redux, Ruby, Ruby on Rails, Thunk, HTML, and CSS

## TECHNICAL PROJECTS

### GrubGo - [Github](#) | [Demo](#)

A mock food delivery app that allows Restaurant Owners full-CRUD capabilities.

- Developed JavaScript/React frontend and Rails/Active Record/SQLite back-end application
- Integrated React Redux to efficiently manage the state of my application in a centralized manner
- Implemented session-based authentication and cookies for authorization, and 'bcrypt' to securely store password

### Blogger's Digest - [Github](#) | [Demo](#)

Designed for writing enthusiasts who want to showcase their work and connect with others in the writing community.

- Built a full-stack web application that allows registered users to create, read, update, and delete blog posts
- Incorporated comment feature that enables users to share feedback on each other's posts.
- Applied React, useContext, Rails, Active Record and CSS to build an interactive and responsive user interface.

### MyCuisine - [Github](#) | [Demo](#)

Developed for users to explore and promote local restaurants serving their best cuisine.

- Created using React and styled components for a responsive design, and integrated with a JSON format database
- Enables users to browse, like and add their favorite restaurants, promoting an interactive user experience
